- GOLD MEDAL**
2011 International Review of Spirits, Chicago

Serving as North America's first single malt distillery, Glen Breton has set a high bar of excellence for single malts created in Canada. Nestled among the hills of Nova Scotia, Canada, forward thinkers founded Glenora Distillery back in 1989 with the help of one of the whisky world's greatest minds, Jim McEwan. Using traditional pot stills, mash tuns and maturation processes, Glen Breton was born and became one of the world's most sought-after single malts (figuratively and legally).

Their water is sourced from MacLellan's Brook, which starts in the Cape Breton Highlands, Glen Breton directly takes on

the identity of their 900-acre property from start to finish. On the property, fields of heather grow alongside a maple wood forest, which directly impacts their flavors while ageing in ex-bourbon casks. With cold winters and hot summers, the ex-bourbon casks elevate the terroir during the natural breathing cycle year after year.

The result of sitting in a dunnage warehouse year after year has resulted in numerous awards from around the world. Enjoy this whisky neat, on a large ice cube or play around with an Old Fashion with a barspoon of maple simple sugar, allspice dram and aromatic bitters.

The First North American Single Malt

PRODUCT OVERVIEW
